## CAREER SUMMARY

Experienced web developer (Computer Science MSc - 3 years Ruby On Rails, 2 years C++ development) looking for a lead or senior engineer role in backend web development.

In my previous positions I learned the value of writing simple and readable modules along with tests and code reviews, when maintaining existing projects or developing new ones.

My current stack is Ruby on Rails and Postgres for the back end, React on the frontend and Docker/Kubernetes/CircleCI on the Ops end. I am fluent in English and advanced in Japanese.

## WORK EXPERIENCE

### ○ Back End Engineer (Freelance)

[Effilab](#)

2017 - 2019 (remote)

Supporting the Effilab business needs by integrating various APIs (Facebook, Aircall, Mailchimp, Meero, etc.) with our Rails 5.2 app, maintaining our GraphQL API and implementing Sidekiq jobs for reporting.

Unit & Integration Tests (RSpec, Capybara), CI/CD (CircleCI, deployment with Kubernetes on Google Cloud Platform)

Multiple side apps (React SPA/Google Addon etc)

#### Technologies used:

Ruby on Rails Sidekiq Docker Rspec/Capybara Postgres Kubernetes/Helm Stackdriver

### ○ Web Developer

[Prium Solutions](#)

2016 - 2017 (Paris)

Junior web developer at Prium solutions (design and development consultancy)

Worked on existing and new projects, support, deployment etc.

#### Technologies used:

Ruby on Rails Linux Nginx Git

### ○ Software Engineer

[Visual Concepts Korea](#)

2011 - 2013 (Seoul)

Video game developer for MLB 2K series. UI/UX, AI.

#### Technologies used:

C++ OpenGL

## SKILLS & TOOLS

### Backend

### Others

## EDUCATION

### MSc in Computer Science

INSA Rennes, France  
2006 - 2011

### Exchange program

Rochester Institute of Technology, USA  
2011-2012

## LANGUAGES

**French** (Native)

**English** (Fluent - TOEIC 985)

**Japanese** (Advanced - JLPT N1)
